

SY Gunsight

Hard Red Spring Wheat Variety
Fully-Loaded Performer

Highlights

- Short plant height with high tillering ability and good straw strength
- Good test weight, protein, and very good end-use quality
- Adjust seeding rate based on plant population
- Industry-leading tolerance to Fusarium head blight

Disease and Pest Tolerance

Agronomics

Maturity	Medium
Test Weight	Very good
Seed Size	Small-medium
Height	Short-medium
Straw Strength	Good
Head Type	Awned
Tillering	Very good
Planting Date	Early to average
Emergence	Average
Protein	Good
Moisture Zone	> 16 Inches

Three-Year Dryland Trial Summary 2017-2019 Syngenta Data

Variety	Three-Year Average				Two-Year Average		2019

Note: these agronomic assessments are made by Syngenta scientists and reflect each variety's relative performance within these characteristics though the 2019 crop year. Specific conditions may cause variations within characteristics. These relative protection values are based on current pest and disease populations and have been known to shift periodically and may cause changes in specific evaluations. Resistance to many other diseases and pests is sensitive to environmental conditions, plant development stages and the presence and intensity of other diseases which may result in specific evaluation inconsistencies. This chart is updated annually to reflect the most current trends. ©2020 Syngenta.
